MOLECULAR DIAGNOSTICS HETTPROMO

In times of Corona virus COVID-19 and influenza viruses, molecular diagnostics have become more important than ever. It is essential to be able to rely on your laboratory equipment. This package is designed to spin both microliter (1.5 / 2 ml) tubes as well as PCR strips in a separate rotor with fast cooling and accelerations for added efficiency. The centrifuge is fully IVD (in-vitro diagnostics) certified – a distinct advantage in the microliter centrifuge market.

From now until **31/07/2020**, you get our cooled microliter centrifuge MIKRO 200 R including the 24-place angle rotor for max. 2 ml microliter tubes and the angle rotor for 4 x 8-tubes PCR strips for the special price below.

For more information and to order, please contact **Dias de Sousa SA**. Complete product information is listed on our website at: www.hettichlab.com
